5/8" thick - \$12.99 per square foot - (heavy duty)

minimum order required

KwikRink Synthetic Ice has 2 surfaces to meet your needs. [KwikRink Commercial](#) and [KwikRink Original](#). Both surfaces perform best in an indoor setting, but can be placed outdoors if covered when not in use. A hard flat subsurface is required in which to place the KwikRink. The surface is not glued or screwed down. It is installed as a floating slab. All panels for both surfaces are solid synthetic with no interior wooden core. Panels are 100% skatable material throughout!

[KwikRink Commercial](#) is a super high performance synthetic ice skating surface used in professional hockey training centers, dryland training rooms & municipal skating rinks. It has been used extensively for professional figure skating venues and theatrical productions, as well as stage shows throughout North America.

[KwikRink Commercial](#) panels are 3/4" thick, (1/2", and 1" thick by special order). Panels are solid synthetic and custom cut to size in either 5' x 4', 4' x 8' or larger depending on the application. Panels are connected together with heavy duty splines to form a rink of any desired size. Performance is in excess of 90% compared to natural ice when properly maintained. Durability is expected to be in excess of 10 years depending on the application. KwikRink offers a 5 year warranty on the 3/4" thick surface. Any and all skating techniques can be done on this surface.

#### KwikRink Commercial Price (US FUNDS)

\$22.99 per square foot 3/4" thick

\$28.99 per square foot 1" thick

Prices for 4' x 8' panels (5' x 4', 4' x 10', & custom sizes available)

[KwikRink Original](#) panels come in four thicknesses: 1/4", 3/8", 1/2" and 5/8" thick. This less expensive surface is excellent for home or garage sized rinks. Panels are connected together with splines to form a rink of any desired size. Performance is in excess of 80% compared to natural ice when properly maintained. Expected durability is 5 to 10 years. KwikRink offers a 1 year warranty on the 3/8" thick surface, a 2 year warranty on the 1/2" thick surface and a 3 year warranty on the 5/8" thick surface. Any and all skating techniques can be done on this surface.

Maintenance is minimal compared to natural ice for both surfaces. An occasional cleaning and application of environmentalley friendly-slide solution to assist skating speed is all that is required.
